7 The need for extending the scheme to areas around the Scientific, Veterinary, Agricultural and Training Institutions with a view to applying the results of scientific achievements to the practical field work and also establishing closer contact between Scientific and Training Institutions and Field staff.

Excepting the taluk of Udipi, the rest of the entire district has been covered by the programme and Udipi taluk will also have its chance in due course. The coverage already achieved in this district has guided Government in making future selections.
